Location: Lahore, Pakistan
Document Date: 22 August 2026 | **Revision:** 1.0
Validity: 30 days from date of issue

1. Executive Summary

Codevelix is pleased to submit this final quotation for the design, development, and implementation of a fully integrated ERP and Manufacturing Management System for Zeenat Pret. This proposal is prepared against your business requirements document and covers production, inventory, multi-branch retail, accounts, HR, purchase, packing, dispatch, gatepass, and management reporting in one connected platform.

The solution is purpose-built for apparel manufacturing and retail operations. It connects the complete workflow from employee attendance and purchasing through production job cards, finished goods, outlet sales, online orders, dispatch, and financial reconciliation — without duplicate data entry across departments.

Total one-time implementation investment: Rs. 800,000 (Pakistani Rupees). Data migration, user training, go-live support, and a post-launch stabilization period are included within this amount.

2. Requirement Coverage Summary

The following table maps your stated requirements to the modules included in this quotation.

Requirement Area	Scope in This Quotation	Delivery
HR & Payroll	Employee records, attendance, shifts, leave, advances, PF, payroll, increments, performance history	Phase 2
Purchase & Procurement	Requisitions, PO, receiving, rejection, returns, exchange, supplier ledger, low-stock alerts	Phase 3
Inventory & Stock	Item master, stock ledger, transfers, issuance, barcode, valuation, multi-warehouse control	Phase 3
Production Management	Style/Job Card, operations workflow, worker assignment, daily production, piece-rate wages, costing	Phase 4
Accounts & Finance	Chart of accounts, vouchers, ledgers, expenses, petty cash, bank/cash, P&L, balance sheet, reconciliation	Phase 5
Packing, Dispatch & Gatepass	Finished goods receiving, packing, dispatch, vehicle/driver gatepass, delivery tracking	Phase 6
Outlet POS (3 Branches)	Barcode billing, hold/resume, exchange, branch stock, transfers, daily closing, party ledgers	Phase 3-4
Integrations	E-commerce order sync, courier booking/tracking/COD, FBR digital invoicing, WhatsApp business	Phase 4-5
Reports & Dashboards	Management and department dashboards, PDF/Excel export, audit trail, role-based access	Throughout Phases

3. Detailed Scope of Work

3.1 Core Platform & Security

- User management with role-based access control (Admin, Management, HR, Purchase, Store, Production, Accounts, Outlet, Security)
- Company and brand configuration with department-wise data visibility
- Configurable approval workflows for purchase, leave, advances, production, and accounts
- Complete audit trail — created by, updated by, approved by, with timestamp and change history
- Daily automated backups, secure cloud hosting, and HTTPS access

3.2 HR & Payroll Management

- Employee registration with CNIC, documents, bank details, department, designation, and employment history
- Shift management with grace period, overtime rules, and shift allocation
- Daily attendance — present, absent, leave, half-day, late arrival, early departure, manual correction with approval
- Leave management — annual, casual, sick, emergency, unpaid; request, approval, balance, and history
- Salary advances with approval, recovery schedule, and remaining balance tracking
- Provident Fund (PF) — employee and company contribution, monthly calculation, ledger, and reports
- Payroll processing — monthly salary, daily wages, production-based wages, allowances, deductions, bonuses
- Salary increments, allowances, and complete employee history

- HR reports — attendance register, leave analysis, payroll register, salary slips, PF summary

3.3 Purchase & Procurement

- Purchase requisition with department request, priority, and approval workflow
- Configurable item categories — fabric, accessories, maintenance, office/general stock
- Supplier master with tax, payment terms, bank details, and transaction history
- Purchase order creation with multi-level approval, tax, discount, and delivery schedule
- Goods receiving against PO with ordered vs received vs rejected quantity
- Rejection management with reason, return status, and replacement tracking
- Purchase returns and supplier exchange with stock and ledger adjustment
- Purchase reports — daily/monthly/supplier-wise/item-wise, pending POs, outstanding quantities
- Automatic low-stock alerts when items fall below minimum level

3.4 Inventory & Warehouse Management

- Product/item master — code, name, category, colour, size, fabric type, barcode, SKU, min/max stock
- Stock ledger — opening, purchase, production, transfer, issue, return, adjustment, damaged, closing
- Stock issuance to production, departments, and approved users with full traceability
- Inter-warehouse and inter-location stock transfers with in-transit control
- Scan-based controls — wrong scan blocked, duplicate scan blocked, negative stock blocked
- Stock valuation reports — item-wise, category-wise, warehouse-wise, movement history
- Finished goods variant control by Article + Colour + Size + SKU

3.5 Production & Manufacturing

- Job Card / Style management — article code, tech pack, BOM version, colour-wise tracking, planned quantity
- Version-controlled Tech Pack and BOM with approval workflow; no hard delete after approval
- Embroidery planning — repeat-wise issue based on configurable machine-head standards
- Backup store — reserve non-embroidered components against Job Card until embroidery reconciles
- Stage-wise production workflow from PO through Finished Goods
- Stage issue/receive with automatic short/excess calculation, allowed loss, debit notes, and vendor/worker rates
- Worker assignment and daily production recording — completed qty, accepted/rejected qty, piece-rate wages
- Weekly worker settlement — stitch, press, pack — with payable ledger and duplicate-payment prevention
- Pre-cost vs post-cost per good suit with variance reporting by article and collection
- Production dashboard — active job cards, stage ageing, embroidery pending, backup reserved, cost variance
- Size-wise control (XS to XL): planned, cut, stitched, packed, short quantities

3.6 Accounts & Finance

- Chart of accounts, journals, vouchers, and period locking
- Supplier payable, customer receivable, worker payable, and courier receivable ledgers
- Automatic day book from production, store, outlet, purchase, and payroll transactions
- Expense management by category with attachments and approval
- Petty cash — opening, received, expense, transfer, closing, reconciliation
- Bank and cash accounts — deposits, withdrawals, transfers, bank reconciliation
- Department-wise reconciliation — production vs payable, FG vs store, outlet vs cash, COD vs courier
- Financial reports — trial balance, P&L;, balance sheet, cash flow, aged receivable/payable
- FBR digital invoicing support for tax-compliant sales invoices where required

3.7 Outlet POS — 3 Branches

- Barcode/SKU billing with article, colour, size, quantity selection
- Hold and resume bill, return and exchange against original invoice
- Multi-payment — cash, card, bank, online, cheque, split payment

- Branch-wise live stock, warehouse-to-outlet transfer with 4-step in-transit control
- Branch purchase, expense, cash/bank accounts, customer and supplier ledgers
- Daily outlet closing — opening + received − paid = expected cash reconciliation
- Role control — Cashier, Outlet Manager, Accounts, Owner with configurable permissions
- Invoice print, WhatsApp delivery, and reprint capability

3.8 Packing, Dispatch & Gatepass

- Scan-based receiving of packed suits from production into finished goods store
- Packing management — order, style, packed qty, carton/box number, packing employee
- Dispatch to outlet, customer, or online order with pick list and courier details
- Gatepass creation — vehicle, driver, material, quantity, destination, authorized person, security verification
- Workflow: Order → Production → Quality → Finishing → Packing → Dispatch → Gatepass → Delivery
- Dispatch reports — daily/weekly/monthly, customer-wise, order-wise, pending vs completed

3.9 Integrations

- E-commerce integration — order import, SKU mapping, stock reservation, fulfilment write-back, inventory sync
- Courier integration — consignment booking from dispatch screen, CN/tracking storage, delivery status, COD reconciliation
- Returned/RTO stock released only after physical scan verification
- Email integration for system-generated documents and notifications

3.10 Reports & Management Dashboard

- Management dashboard — employees, attendance, payroll, purchases, inventory, production, dispatch, accounts
- Department dashboards for HR, Purchase, Inventory, Production, Accounts, and Dispatch/Security
- Configurable alerts — low stock, pending approvals, production delays, pending dispatch, outstanding balances
- PDF and Excel export on all major reports
- Advanced search and filter by date, department, employee, supplier, item, style, order, status

4. Implementation Approach

Codevelix follows a phased delivery model to reduce business disruption and ensure each department is trained before the next module goes live.

Phase	Duration	Activities	Key Output
Phase 1 Foundation	Week 1–2	Discovery, blueprint, master data structure, users, roles, dashboards, chart of accounts	Signed blueprint & configured base system
Phase 2 HR & Payroll	Week 3–4	Employee enrollment, attendance, shifts, leave, advances, EFU HR & payroll setup	Live HR & payroll module
Phase 3 Purchase & Inventory	Week 5–6	Requisitions, PO, receiving, stock, transfers, low-stock alerts	Live purchase & inventory
Phase 4 Production & POS	Week 7–9	Job Card, workflow, worker wages, costing, outlet POS (3 branches), integrations	Live production, POS & integrations
Phase 5 Accounts	Week 10	Vouchers, ledgers, reconciliation, financial reports, FBR invoicing	Live accounts module
Phase 6 Dispatch & Go-Live	Week 11–12	Packing, dispatch, gatepass, data migration, UAT, training, go-live & handover	Production system & handover

Total estimated delivery timeline: 12 weeks from contract sign-off and receipt of initial master data, subject to timely client approvals and staff availability for training.

5. Dedicated Project Team

Role	Allocation
Project Manager	1 — single point of contact throughout engagement
Business Analyst / Implementation Consultant	2 — requirement mapping, configuration, UAT
Production / Apparel Specialist	1 — job card, embroidery, workflow, costing setup
Integration Engineer	1 — e-commerce, courier, and third-party API connections
Data Migration Engineer	1 — master data import and opening balance verification
Support Engineer (Post Go-Live)	1 — dedicated for stabilisation and after-sales support

6. Commercial Proposal

6.1 One-Time Implementation Investment

Codevelix offers a complete end-to-end implementation of the integrated ERP and Manufacturing Management System as defined in Section 3 of this quotation. The investment covers all modules, integrations, data migration, training, and go-live support.

Description	Amount (PKR)
Complete ERP Implementation — all modules, 3 outlet branches, integration, data migration, training, UAT, go-live support	**Rs. 800,000**

This investment includes:

- Core platform with users, roles, security, and approval workflows
- HR, attendance, and payroll management
- Purchase, procurement, and supplier management
- Inventory, warehouse, and stock control
- Production and manufacturing (Job Card, embroidery, workflow, costing, dashboard)
- Accounts, finance, and department-wise reconciliation
- Outlet POS for 3 branches
- Packing store, dispatch, and gatepass management
- E-commerce and courier integration
- Reports, dashboards, and management analytics
- Data migration, opening balances, on-site training, UAT, and go-live support

Payment terms: 50% (Rs. 400,000) upon contract sign-off | 50% (Rs. 400,000) upon go-live and final handover.

6.2 After-Sales Services & Annual Maintenance

Codevelix provides structured after-sales support so your operations continue smoothly after go-live. The following services are available as monthly or annual plans:

Service	Standard Plan	Premium Plan
Cloud hosting, SSL, daily backups & system updates	Included	Included
Software licence for all contracted modules	Included	Included
WhatsApp, phone & email technical support	Business hours	24/7 priority
Bug fixes & security patches	Included	Included
Minor configuration changes	Up to 4 hrs/month	Up to 10 hrs/month
New user training	1 session/quarter	Unlimited sessions
Monthly system health check & performance report	—	Included
Dedicated account manager	—	Included
Emergency on-site visit (Lahore)	—	1 visit/quarter
Monthly subscription (all users)	Rs. 45,000/month	Rs. 75,000/month
Annual subscription (pay yearly — 2 months free)	Rs. 450,000/year	Rs. 750,000/year

Note: After-sales subscription begins from the go-live month. First 60 days post go-live include complimentary Standard Plan support at no additional charge as part of the implementation package.

6.3 What Is Included at No Extra Cost

- Complete data migration — articles, components, colours, sizes, parties, workers, rates, opening stock and balances
- Role-based on-site training in Urdu or English for all departments
- User Acceptance Testing (UAT) support and issue resolution
- 60-day post go-live stabilisation with dedicated support engineer
- Blueprint workshop within 5 working days of contract acceptance
- All reports, dashboards, PDF/Excel export, and audit trail features

6.4 Exclusions

- Hardware — barcode scanners, label printers, POS terminals, biometric devices, and networking equipment
- Third-party subscription fees — e-commerce platform, courier account, SMS gateway, or payment gateway charges
- Government taxes (GST/SRB) applicable on services as per prevailing law
- Travel and accommodation for out-of-city visits beyond Lahore (if required)
- Additional custom features, new modules, or branches beyond three outlets — quoted separately as change requests
- Historical transaction data migration (opening balances and master data only are included)

7. Terms & Conditions

Validity: This quotation is valid for 30 days from the date of issue.

Payment: 50% advance upon contract sign-off; 50% upon successful go-live and final handover.

Taxes: All prices are exclusive of applicable taxes unless stated otherwise.

Client Responsibilities: Client will provide clean master data, approval matrices, rate cards, machine-head standards, and staff availability for training within agreed timelines.

Change Requests: Any scope change beyond this document will be documented and quoted separately before work begins.

Timeline: Delivery schedule depends on timely data provision, approvals, and sandbox/API access for integrations.

Intellectual Property: Upon full payment, Zeenat Pret receives a perpetual licence to use the delivered system. Codevelix retains ownership of the underlying platform framework.

Confidentiality: Both parties agree to keep commercial terms and business data confidential.

Warranty: Codevelix warrants that delivered modules will perform as described in this document for 90 days post go-live, covered under the included support period.

Force Majeure: Neither party shall be liable for delays caused by events beyond reasonable control.

8. Agreement & Acceptance

By signing below, both parties accept the scope, delivery approach, commercial terms, and after-sales services outlined in this quotation.
