PROFESSIONAL EXPERIENCE

Web Developer

Immi Garments, Lahore

October 2020 - Present

- Design, develop, and maintain PHP and Laravel web applications for business workflows and operational users.
- Build responsive, mobile-friendly interfaces with HTML5, CSS3, Bootstrap, jQuery, AJAX, and JavaScript.
- Develop backend logic, MySQL queries, and database-driven modules focused on reliability, scalability, and maintainability.
- Translate business requirements into functional web solutions that improve usability and support day-to-day operations.
- Diagnose and resolve bugs, compatibility issues, and performance problems across front-end and back-end code.
- Collaborate with internal teams throughout the full project lifecycle to deliver stable, user-friendly applications.

Web Developer

IT Genesis, Lahore

November 2019 - October 2020

- Built and maintained PHP-based web applications aligned with client requirements and project objectives.
- Developed responsive front-end layouts using HTML5, CSS3, Bootstrap, and JavaScript for desktop and mobile users.
- Implemented interactive website features that improved usability, navigation, and user engagement.
- Supported front-end and back-end integration with server-side PHP functionality and MySQL database operations.
- Improved application performance by refining front-end behavior, backend logic, and page loading flow.
- Troubleshot coding issues, browser compatibility problems, and defects to maintain stable web applications.

- Worked with team members to complete development tasks within deadlines and quality standards.

SELECTED PROJECTS

The Phone Lads - Mobile Accessories and Repair E-Commerce

- Developed a UK e-commerce and repair website for mobile accessories, power banks, travel adapters, and device services.
- Built product catalogue, deals, repair booking, mobile-ready product discovery, responsive UI, and SEO-ready storefront features.

TCRBlooms - Premium Flower Shop and Online Store

- Developed a UK flower e-commerce store for bouquets, gifts, custom arrangements, secure checkout, and nationwide delivery.
- Implemented product catalogue, bouquet ordering, custom arrangement flow, responsive UI, and SEO-ready storefront pages.

Premium Cad Cam - Dental Aligner and CAD Portal

- Built a Laravel dental services portal for patient case intake, scan and CAD uploads, aligner workflows, and correction management.
- Implemented secure authentication, dental case management, file upload workflows, and multi-round correction tracking.

Gems Drive - UK Car Rental CRM

- Developed a Laravel CRM for car rental operations, vehicle check-in and check-out, damage sheet capture, and reporting.
- Added operational reports, exports, and automated email notifications for staff, customers, and administrators.

Robe Spa - Dubai Spa and Wellness Website

- Created a Dubai spa and wellness business website for treatment presentation, booking enquiries, and premium brand positioning.
- Built mobile-first responsive pages, lead enquiry paths, SEO-ready content pages, and a polished user experience.

MSBBL - Dubai Network and Residential CRM

- Developed a Laravel CRM for managing multiple network sites, residential areas, customer records, and operational workflows.
- Built customer database features, financial reporting, area tracking, and admin dashboards.
