PROFESSIONAL EXPERIENCE

Web Developer *October 2020 - Present*

Immi Garments, Lahore

- Design, develop, and maintain dynamic web applications using PHP, Laravel, JavaScript, and MySQL.
- Build responsive and user-friendly interfaces with HTML5, CSS3, Bootstrap, jQuery, and AJAX.
- Optimize backend processes, PHP code, and database queries to improve application performance, reliability, and scalability.
- Translate business requirements into functional web solutions that support operational workflows and user needs.
- Diagnose and resolve bugs, compatibility issues, and performance problems to maintain a consistent user experience.
- Collaborate with internal teams throughout the project lifecycle to deliver high-quality web applications on schedule.

Web Developer *November 2019 - October 2020*

IT Genesis, Lahore

- Built and maintained PHP-based web applications aligned with project requirements and client expectations.
- Developed responsive front-end layouts using HTML5, CSS3, Bootstrap, and JavaScript for desktop and mobile users.
- Implemented interactive website features to improve usability, navigation, and user engagement.
- Improved front-end and back-end performance for faster loading times and smoother application behavior.
- Supported integration between user interfaces, server-side functionality, and MySQL database operations.
- Troubleshot coding issues and resolved defects to maintain stable and reliable web applications.
- Worked with team members to deliver development tasks within tight deadlines and quality standards.

SELECTED PORTFOLIO PROJECTS

The Phone Lads - Mobile Accessories and Repair E-Commerce

- Developed a UK e-commerce and repair website for mobile accessories, power banks, travel adapters, and device services.
- Built an accessory catalogue, deals section, repair booking flow, mobile-ready product discovery, responsive UI, and SEO-ready storefront.

TCRBlooms - Premium Flower Shop and Online Store

- Developed a UK flower e-commerce store for bouquets, gifts, custom arrangements, secure checkout, and nationwide delivery.
- Implemented bouquet catalogue, product catalogue, custom arrangement flow, responsive UI, and SEO-ready storefront pages.

Premium Cad Cam - Dental Aligner and CAD Portal

- Built a Laravel dental services portal for patient case intake, scan and CAD file uploads, aligner workflows, and correction management.
- Implemented secure authentication, dental case management features, file upload workflows, and multi-round correction tracking.

Gems Drive - UK Car Rental CRM

- Developed a Laravel CRM for car rental operations, vehicle check-in and check-out, damage sheet capture, and operational reporting.
- Added reports, exports, and automated email notifications for staff, customers, and administrators.

Robe Spa - Dubai Spa and Wellness Website

- Created a Dubai spa and wellness business website for treatment presentation, booking enquiries, and premium brand positioning.
- Built mobile-first responsive pages, lead enquiry paths, SEO-ready content pages, and a polished user experience.

MSBBL - Dubai Network and Residential CRM

- Developed a Laravel CRM for managing multiple network sites, residential areas, customer records, and operational workflows.
- Built customer database features, financial reporting, residential area tracking, and admin dashboards.
